Continuation of Substance of Interview including description of the general nature of what was discussed: Examiner Sorkin communicated that claim 1 would be allowable if the two occurrences of "horizontal" were changed to "panel", with the understanding a panel is by definition is a flat or generally planar thing. This would relate the orientation of the vessel to another part of the claimed structure, the panel, rather than the horizon. However, Mr. Rittman declined this offer, explaining that "the key element really is the tilting with respect to horizontal to get the air/liquid interface" .
